## Antiqued Bamboo Frame

### Materials Needed:

- Bamboo Frame or frame of your choice
- Sandpaper (medium grade)
- Design Master Spray Paint - color of your choice
- Ceramcoat black glaze
- Clear Matte Finish Spray Sealer

### INSTRUCTIONS:

1. Using a medium grade sandpaper, lightly sand the frame. This will help the paint to adhere to the wood.
2. Spray paint the frame with any Design Master color. Let dry completely.
3. Using the Ceramcoat black glaze, cover frame completely paying special attention to the knots in the bamboo. Wait 2-5 minutes (depending on air temperature) and gently wipe off as much of the glaze as you prefer. Let dry completely.
4. Spray the frame with a clear matte finish sealer. Let dry completely before putting artwork in.
