Make Your Own Beautiful Beaded Ornaments

Materials Needed:

Glass ornaments
Tiny glass marbles ("no hole" beads)
Special double-sided peel & stick adhesive
You can use our self-service die-cutting machine to cut special holiday patterns in the double-sided adhesive sheets.

Here's how to make and enjoy them as easy as 1-2-3

1. Cut and Apply the Adhesive: You can use the double-sided tape to make ribbon-like stripes on the ornament, or in this example, use the die-cut machine and a holiday pattern of your choice to make a holiday-type design. Peel off the removable backing on one side of the cut-out pattern elements and adhere the sticky side of the cut-out to your ornament.

2. Pour On Beads: Once you have cut out and applied the adhesive tape or die-cut pattern elements to your ornament, peel off the remaining removable paper backing to expose the sticky side. Then repeatedly pour the "no hole" beads over the ornament so that they adhere to all exposed sticky surfaces.

3. Enjoy the Pleasing Results!: Once you get the hang of it you can branch out with new patterns and new colors. Experiment with both the tape as well as the adhesive sheets for a varied look.

Have a great time with this great project!
