Hanging Bottle Wind Chime

Materials

Hanging Tea light Bottle CFI 73
Acrylic Beads
Wax Coated Acrylic Beading Cord or
Strong String
Novelty Yarn or fabric scraps in length
Wire cutters
Pliers
Needle

Instructions

1. Remove the tea light holder from bottle and cut the holder about 2 inches down from the first curve. This will give you a length of metal stem that has the pre-bent hanging loop at the top end and about 6" of stem below it that you will now bend into a second loop that will hold the strung beads and yarn/fabric decorations.
2. String the acrylic beads onto the cord by threading the cord onto a needle and pushing it through the bead top center out through the bottom back through the top and repeat so the bead is twice encircled by the cord. Measure about 3" down on the cording length from the first bead and attach the second bead. Repeat this process until you reach the beaded cording length desired. We used 4 beads for our model and about 3/4 yard of cording.
3. Attach the beaded cord to the metal stem loop. Add the yarn and/or fabric embellishments.
4. Securely hang in your desired location.
