## Bug Hut

*Designed by Jana Garland*

### MATERIALS NEEDED

15" x 19" paper  
Metal mesh, Making Memories or Robins nest  
Brads  
Tag - Making Memories  
Sticker letters  
Metal letters - metallic accents from Die Cuts with a view  
Wire, pliers

### INSTRUCTIONS:

1. Use our [Accu-Cut Die Cut Machine](#) to cut the cardstock using the "large take-out box" die and cut a window on one side -before you fold it. Use brads to mount fitted piece of mesh on the inside of your window.
2. Attach stickers and letters to tag and mount to box front with a brad. Fold your box and glue the edges together.
3. Cut a piece of wire 10" - 12" long. Run one end from the outside of the box in at the hole on the side, and using pliers twist the end just enough to make it bigger than your hole. Do the same with the other end of the wire on the other side. Your bug hut is complete.
