Geo Mesh Carrot

Supplies

- Geo Mesh (Décor Net) in Orange and Green
- Paper Cone
- Acrylic Paint in Orange
- Hot Glue Gun
- Scissors
- Foam Brush

Directions

1. Using the foam brush, completely cover the paper cone (inside and out) in the orange paint.
2. Set aside to let dry.

You will wrap the geo mesh (décor net) around the cone.

3. Depending on the size of the paper cone, cut the geo mesh to the amount you will need to cover the cone.
4. Once the cone is dry, roll the geo mesh around it at an angle, tucking the excess mesh into the cone.
5. Cut a strip of the green geo mesh (décor net). You will be tucking it into the cone but before you do that, apply glue with the hot glue gun to the orange mesh on the inside part of the cone.
6. Tuck the green mesh halfway into the cone (and onto the hot glue). This will prevent the green mesh from falling out.
7. You can play around with the green mesh to give it a good fluff to resemble the leafage on an actual carrot.
