## Glass Etching

**All these supplies can be found in our Hard Crafts Dept.**

- "Armour Etch" Glass Etching Cream
- Stencil
- Craft stick
- Scissors
- Glass surface
- "Creative" Glass Etching book

### It's as Easy As 1-2-3...

1. Clean the glass surface. Select the design and cut from sheet. Tape stencil in position. Apply stencil to glass surface using the craft stick. Carefully peel the back.
2. Apply a border of masking tape around stencil overlapping the tape on the blue stencil material. This overlap prevents the cream from seeping onto the glass.
3. Apply a thick layer of Armour Etch Glass Etching Cream. Do not leave the Etching Cream on for more than one minute. Immediately wash off all etching cream under cool water. Remove the stencil and the masking tape.
