How to Make a Ring

Supplies

- Ring Blank
- Cement Bond
- Bead, Object, or Charm

Directions

1. Apply glue to the top flat surface of the ring blank. For this project, Nancy used G-S Hypo Cement, but you could also use E-6000. With any strong bonding glue, be sure you are in a well ventilated area before using.

You can glue an object onto a ring blank as long as it has a flat back.

2. Place the object onto the glue, placing pressure for a few moments to securely adhere it to the glue.
3. Let dry before wearing.
