Mica Powder Eggs

Materials Needed:

LuminArt Simple Solution #2 (for Paper, found in our Scrapbooking Dept.)
LuminArt Mica Pigment Powders
LuminArt Mica Finishing Powder
Glitter
Small Spoons / small disposable cups
Glass Egg, any size

INSTRUCTIONS:

1. Remove top of glass egg and using Simple Solution #2 put about a teaspoon into egg; swirl until egg is coated. Turn upside down (over small disposable cup) and allow any excess to drain out (the inside of the egg should have a milky coating.)
2. Add glitter inside egg and shake until it is distributed evenly.
3. Start adding pigment powder using small spoon and shaking between each color until egg is colored on the inside as you want it.
4. Using Finishing Powder (color of your choice), put about a teaspoon inside egg and shake well. Lightly shake out any excess over disposable cup. Put the top back on!
