## Mummy Pots

### Materials Needed

Terra Cotta Pot - 5 ½ inches tall  
Muslin – at least 2 torn strips - 1" x 44" (you can add more as desired)  
2 black 10 mm Pom Poms  
Acrylic paint: fluorescent green or orange  
Stencil brush  
Paper towel  
Hot glue gun

### INSTRUCTIONS

1. Glue the end of a muslin strip to the rim of the terra-cotta pot with a small drop of glue.
2. Wrap the strip around the pot, gluing it lightly in place as needed.
3. Continue covering the pot with muslin strips, gluing the beginning of each new strip to the end of the previous one. Occasionally twist the muslin during the wrapping process to add dimension, and glue the twist to the pot.
4. When the pot is completely covered (do not cover the bottom of the pot), dip a stencil brush lightly into the fluorescent paint. Dab the brush on a paper towel to remove any excess paint, and lightly brush on the muslin until the pot is covered. Allow the paint to dry.
5. Add black Pom Poms for eyes.
