Waters of Mars Necklace

This necklace is very easy to make. The look is modern and brings cool elements together leaving the Beadalon Silver Plated wire exposed to its natural beauty.

MATERIALS

Mighty Crimper Tool
Designer Flush Cutter
19 .024" 19 strand Beadalon silver plate wire
3 Paula Radke Crystal rainbow Dichroic tube beads
4 red round fire polish beads
2 smooth 4mm bicone clear color beads
4 crimp covers – silver color, 4mm
4 crimp beads #2
1 Designer spring ring, silver plated
6 barbell silver plated spacer beads
4 pre-opened crimp covers, silver plate

INSTRUCTIONS:

1. Attach double round ring end of Designer spring ring to Beadalon 19 strand silver plated wire with crimp bead. Crimp as per instructions on package of crimp beads with standard crimp tool. Cover crimped bead with crimp cover and close with Mighty crimp tool, as per instructions on crimp cover package.

2. String on 1 crimp bead then follow pattern of photo. Once all beads are used string on another crimp bead.

Affix Beadalon wire to Designer spring ring and finish to desired length (design is approximately 16" finished). Once the crimp has been formed, cover with crimp cover (as above). Place beaded design in the center of the necklace and crimp the strung on crimp bead, leaving about 3/16" space crimp opposite end. Cover the crimps in the design with crimp covers.
