## No-Knit Scarf

### Materials Needed:

Yarns & Ribbons of your choice (must be hand washable in water)  
505 Basting Spray  
Scissors  
2 yards Water Soluble Stabilizer  
Thread (matching or decorative)  
Sewing Machine

*Finished size: approx. 8" x 60"*

*You will be assembling a "sandwich" of yarn between two layers of water-soluble stabilizer.*

### INSTRUCTIONS:

1. Cut stabilizer into two pieces, approximately 10" x 72". Set one piece aside and lay the other flat on the table. Following the manufacturer's instructions, spray 505 Basting Spray on the "up" side of the stabilizer.
2. Unwind several feet of yarn. Holding it approximately one foot above the table, guide the yarn onto the stabilizer while letting loops form. Repeat this process using as many yarn selections as desired. You may wish to draw your design on paper and lay it under the stabilizer while you arrange your yarns. Arrange the yarns in any design you desire: create a free-form of scribbles or arrange yarns in a grid pattern. Completely cover the area, or leave open spaces to create a lace effect...the possibilities are endless!
3. Retrieve the remaining piece of stabilizer. Spray one side with basting spray. Lay the sprayed side facing down on top of your arrangement of yarns. Press down firmly with your hands to hold the layers of stabilizer together.
4. Stitch the "sandwich" in a free-form of simple grid pattern. Do whatever inspires you. Keep in mind that the stitching is what will hold the scarf together, so make sure your stitching includes the outer edges and is evenly distributed. You may also use a darning foot for more freedom of movement on the machine.
5. Remove the stabilizer by rinsing the scarf under running warm water. Rub very lightly until all stabilizer is rinsed away. This may take several minutes. Let dry.
6. If desired, additional embellishments such as beads, charms, or fringe may be added for a unique finishing touch.
