## Photo Restoration

(Monroe store)

We can restore your precious family photos so that they can be enjoyed for generations to come! Scott, our Color Copier Expert, is trained to use the computer to skillfully touch up images of your damaged photo to make it better than the original! Stop by to see her samples, and get an estimate on having your photos restored soon, so that you can preserve and pass on your heritage.

### All you need to do is:

1. Bring your old photos to our Ben Franklin Crafts & Frames Color Copier Center. (Monroe store)
2. Our Copier/Restoration Expert will start by giving you an estimate. Then your photos will be scanned in the computer. Nothing is done to the originals. Once the image is scanned in the computer, the original is return to you. The restoration process is then done on the computer and printed out on the color copier to your specification of size with several choices of paper to be used.
3. Don't forget to schedule a pick-up date at your convenience.
