Supply List:

Tin Star
10 Photographs 4" X 6"
5 -12" x 12" Patterned Paper Decoupage
Tim Holtz Distress Ink
Daubers
Optional: Additional embellishments such as
gems, ribbon, buttons, etc.

Tools:

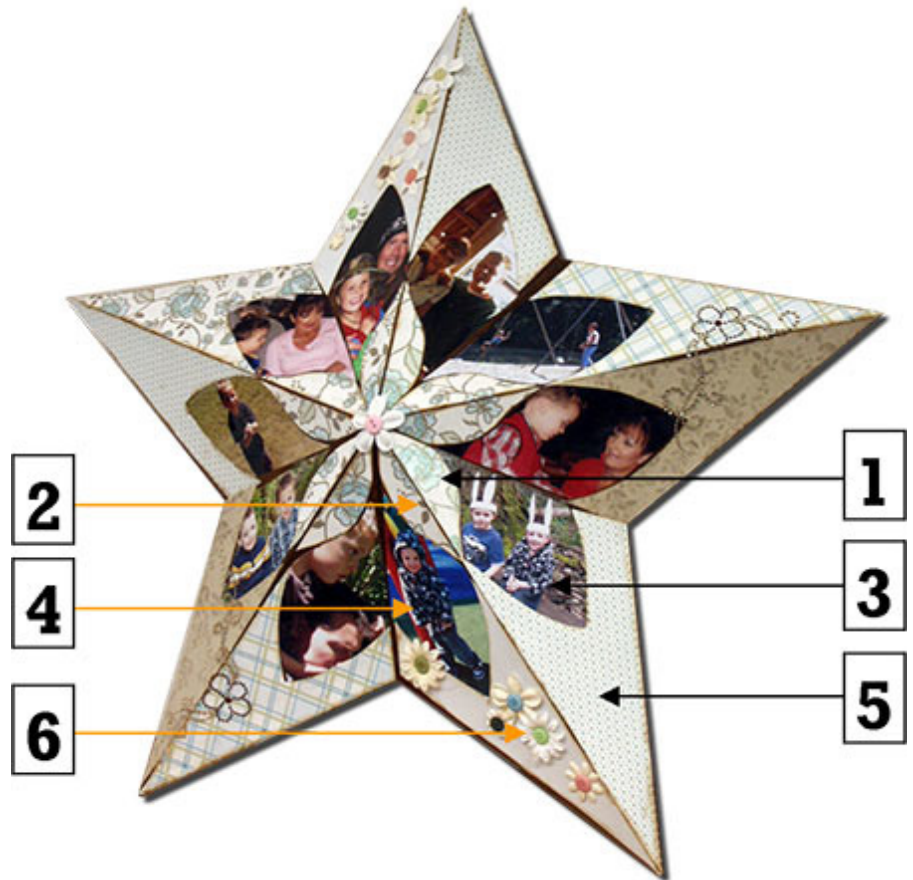

Paper Trimmer
Ruler
Pencil
Scissors

TEMPLATE:

Print template [here](#). Once the page opens,
right click on the image and select "print
picture".

Instructions:

1. Start by making a sturdy set of [templates](#). (We recommend chipboard or a heavy cardstock). Cut out the shapes and trace them onto your heavy cardstock and carefully cut your traced shapes out. Label each side of the templates with it's corresponding number (see picture of star).
2. Using your templates trace onto the front side of your patterned paper and photos. Carefully cut out your shapes and arrange onto the star making sure that your photos will face the right direction.
3. When you are satisfied with your layout you can start to "distress" the edges of your scrapbook paper pieces. Use the Distress Ink along the edges of each shape, this will remove the bright on the edges and blend it with the color of the star.
4. Then decoupage your photos and paper to your tin star. Let dry completely. Add a top coat of decoupage to seal completely. *Note: The decoupage does dry clear and the finish will depend on whether you choose matte or glossy decoupage.*

Design Idea: when dry add additional embellishments such as gems, ribbon, buttons or vinyl lettering. Custom sayings and graphics are available at our Monroe store's Copy Center!
