Sculpey Amazing Eraser Clay - Boo!

Design by Amy Koranek - Project courtesy of sculpey.com

Materials Needed:

- Sculpey Eraser Clay:
Purple, Pink, Orange, Blue, Green, Yellow

- Some household tools you might want to use for this project:
toothpick or large needle, old rolling pin or heavy glass jar

INSTRUCTIONS:

All Amazing Eraser Clay should be conditioned before use. Just knead the clay in your hands until soft and of even consistency. Once your project is complete, bake in your home oven at 250 for 10 minutes. Over baking will cause the erasers to not erase very well. Make sure your oven is the right temperature by checking it with an oven thermometer. Allow the erasers to cool completely before handling them.

1. Roll some purple out into a thick slab.
2. Shape 3 orange worms. Bend the worms into the letter "B" and trim them as necessary. Push the "B" on the left edge of the purple slab but leave a border of purple showing.
3. Flatten a blue ball and a green ball right next to the "B". Add a yellow eyeball to each "O" and put a purple ball on top. Score veins all over the eyes.

4. Make a "!" with a pink teardrop and ball. Press these on the end of the word "BOO". Trim the purple all the way around the "BOO!" leaving a border.
