## Making a Fresh Wreath

**Step 1**

**Step 2**

**Step 3**

### Materials Needed:

Paddlewire  
Wire Wreath Form  
Wire Cutters  
Ribbon

### INSTRUCTIONS:

1. Take your bough and cut into approx. 6 in. pieces. Gather 4-6 of these pieces of greens. Lay onto your wire form and begin to wrap the stem to the form with your paddle wire, keeping it going continually (do not cut the wire yet).
2. Continue step 1 around the form, pulling the wire from the previous grouping to the newly added grouping and wrapping. Cut the wire only once you've come full circle.
3. Complete the wreath and add a coordinating holiday ribbon as a final touch. Hang and enjoy!
