How to Bend Memory Wire (Jan. 07)

Step 1

Place the end of the Memory Wire between the tips of the Round Nose Pliers.

Step 2

With one movement of the pliers, carefully bend the wire backwards going against the wire's natural curve for an outside loop. For an inside loop, bend the wire towards its natural curve.

Step 3

Repeat the previous step until you have formed a loop at one end of the Memory Wire.

Dangle a bead or a charm from the loop end for a playful look that adds movement.
