Accu Cut Die Cut Machines (August 07)

How to use our Accu-Cut Roller Die Cutting Machines:

Step 1:

Place the die completely inside the tray with the foam side up. It is often helpful to angle the die slightly in the tray. Place material on top of the die.

Step 2:

Push die and tray until die meets roller. Turn handle to feed the die and tray through the machine.

Step 3:

Remove cut-out shape and repeat the process from the opposite direction.

The Accu-Cut System will cut anything you can cut with scissors... only better!
