Class Description/Outline:

We will be making a serving tray with pressed flowers. You will learn how to properly mix the resin and pour into the mold to create a tray that you will get to customize with the layout of pressed flowers we will lay into the resin. This process requires patience as we will have to pour in layers and wait for each layer to cure a bit before we do the next. After we pour our molds, I will demonstrate how to install the handles after curing. I will walk you through each step and answer any questions you may have to the best of my knowledge. Make sure to wear clothes that are not of importance. Due to curing time, projects will be ready for pick up 2 days after Wednesday class.
